

# Supplementary Figure S9. Correlation between barcode compositions in Traditium samples

Correlation of BC frequencies between POTs and T<sub>0</sub>

**Supplementary Figure S9. Correlation between barcode compositions in Traditium samples.** Ranked correlation between barcode composition in 3 POTs (pre-treatment) and 20 time zero (T<sub>0</sub>) replicates (upper triangle: correlation plots; diagonal: sample names; lower triangle: significance values from Spearman correlation test). AI1-10 T<sub>0</sub> reflect Hyperflask seeding in -E2 flasks. TAM 1-10 T<sub>0</sub> reflect seeding in TAM Hyperflasks (Technical problems effected the analysis of two samples -AI5 and AI6-).
