

Figure S26. (A) Proportion of CD8 T cells in non-responder and responder patients split by timepoint. Statistical comparisons performed using a Wilcoxon signed-rank test. (B) Multiplexed immunofluorescence (mIF) images of BL, FU1 and FU2 samples from two patients, E40 (slow progressor) and E41 (fast progressor), staining for panCK, PD-L1, CD4, CD8 and Granzyme B. (C) Proportion of CD8 T cells macrophages, obtained from mIF images, at BL, FU1 and FU2 in non-responder and responder patients. Statistical comparison performed using a Wilcoxon signed-rank test. (D) Proportion of naive, memory, effector and exhausted CD8 T cell subsets in non-responder and responder patients split by timepoint. Statistical comparisons performed using a Wilcoxon signed-rank test. (E) Proportion of regulatory T cell and Th1 CD4 T cell subsets in fast v.s. slow progressor patients split by timepoint. Statistical comparisons performed using a Wilcoxon signed-rank test. (F) Expression of CXCL13 in CD4 T cells in fast v.s. slow progressor patients split by timepoint. Statistical comparisons performed using a Wilcoxon signed-rank test.
