

Supplemental_Fig_S10.pdf: Codon usage in *L. donovani* genes in each chromosome. Comparison of Measure Independent of Length and Composition (MILC) in Chromosome 31 (red) and all other chromosomes combined (black), represented as **A) density plots, **B)** boxplot and violin plots. **C)** Comparison of MILC (Y axis) and gene length (X axis), **D)** Log10 MILC in each chromosome. **E)** Heatmap of the codon relative presence in genes from each chromosome.**
