**Supplementary Figure 1. (A)** Immunoblot analysis of protein levels of POLR1A, POLR2A, POLR3A, MYC, p53 and  $\gamma$ H2AX in U2OS cells treated with chemotherapeutic drugs for 4 hours **(B)** Immunoblot analysis of POLR1A in U2OS and BJ fibroblasts treated with increasing concentrations of CX-5461 for 4 hours. **(C)** RT-qPCR analysis of *POLR1A*, *POLR2A*, *POLR3A*, *MYC* mRNAs and 47S rRNA in BJ fibroblasts, HT29 and RKO cells. Data are presented as the mean  $\pm$  SD (n=3), \*= P value < 0.05, \*\*= P value < 0.01, \*\*\*= P value < 0.001 by Student's t test versus untreated cells **(D)**. RT-qPCR analysis of the mRNA levels for the twelve subunits of II and 47S rRNA in U2OS cells treated with BMH-21 (1  $\mu$ M), Aclarubicin (1  $\mu$ M) and CBL0137 (1  $\mu$ M) for 3 hours. Data are presented as the mean  $\pm$  SD (n=3), \*= P value < 0.05, \*\*= P value < 0.01, \*\*\*= P value < 0.001 by Student's t test versus untreated cells **(C)**.

**Supplementary Figure 2. (A)** Immunofluorescence images of representative cells stained with Fibrillarin and Nucleophosmin primary antibodies after treatment with BMH-21, Aclarubicin, CBL0137 and Actinomycin D for 4 hours. Scale bar 5  $\mu$ m. **(B-C)** Immunofluorescence images of representative cells stained with 5.8S rRNA and POLR1A primary antibodies after treatment with BMH-21 and Aclarubicin in U2OS and BJ fibroblasts cells. Scale bar 5  $\mu$ m. White arrows show nucleolar regions.

**Supplementary Figure 3. (A)** Immunoblot analysis of POLR1A, POLR2A (D8L4Y) and POLR3A in HT29, RKO, BJ, A375 and LoVo cells treated with 1  $\mu$ M BMH-21 for 3 hours. **(B-E)** Immunoblot analysis of BJ Fibroblasts whole cell lysates and subcellular fractions treated with increasing concentrations of **(B)** BMH-21, **(C)**

Aclarubicin, (D) CBL0137 and (E) U2OS cells treated with Actinomycin D. Values under immunoblots represent ratios of POLR1A levels compared to concentration 0 and normalized using their respective Lamin A/C signal. (F) Immunoblot analysis of POLR3A and UBF in whole cell lysate and cellular fractionations of U2OS cells treated with BMH-21 (0.5 and 5  $\mu$ M), Aclarubicin (5  $\mu$ M) and CBL0137 (5  $\mu$ M) for 3 hours.

**Supplementary Figure 4.** (A) Immunoblot analysis of phosphoSer139-H2AX in U2OS cells pre-treated with growing concentrations (0.1-1  $\mu$ M) of BMH-21 for 1 hour and further treated with 1  $\mu$ M Doxorubicin and 1  $\mu$ M Etoposide for 3 hours. (B) Immunoblot analysis of phosphoSer139-H2AX in U2OS pre-treated with Actinomycin D and Triptolide and further treated with 1  $\mu$ M of Doxorubicin and Etoposide for 3 hours.

**Supplementary table S1. Cell lines**

| <b>Cell line</b> | <b>Medium</b>            |
|------------------|--------------------------|
| U2OS             | DMEM 10% FBS + Pen/strep |
| BJ fibroblasts   | DMEM 10% FBS + Pen/strep |
| RKO              | DMEM 10% FBS + Pen/strep |
| Lovo             | DMEM 10% FBS + Pen/strep |
| HT29             | DMEM 10% FBS + Pen/strep |
| A375             | DMEM 10% FBS + Pen/strep |
