

Supplementary Material

Supplementary Table 1. Number of lung cancer deaths by baseline calendar period and smoking status.

Calendar period	Smoking Status	Lung cancer deaths
1991-1993	Never	45
	Former	210
	Current	338
1994-1995	Never	23
	Former	90
	Current	159
1997-1999	Never	58
	Former	227
	Current	358
2000-2002	Never	50
	Former	193
	Current	286
2003-2005	Never	42
	Former	168
	Current	266
2006-2008	Never	52
	Former	111
	Current	160
2009-2011	Never	30
	Former	106
	Current	117
2012-2014	Never	19
	Former	52
	Current	61

Supplementary Table 2. Estimated number of smoking-attributable and smoking-unrelated lung cancer deaths in the U.S., 1991-2018.

Year	Lung Cancer Deaths	
	Smoking-attributable	Smoking-unrelated
1991	96,897	25,257
1992	97,914	25,496
1993	98,226	26,607
1994	98,378	26,076
1995	98,324	26,420
1996	98,001	26,475
1997	98,027	26,481
1998	98,288	26,779
1999	95,285	26,757
2000	96,869	27,246
2001	96,450	27,233
2002	96,418	27,469
2003	95,527	27,823
2004	94,595	28,105
2005	93,893	28,492
2006	93,391	27,621
2007	92,202	28,200
2008	91,825	27,377
2009	91,409	27,287
2010	90,339	27,700
2011	89,296	27,719
2012	88,985	28,415
2013	88,273	28,129
2014	87,288	28,996
2015	85,657	29,029
2016	83,204	27,363
2017	80,492	27,814
2018	78,450	26,798

Supplementary Figure 1. Hazard ratios for lung cancer mortality in never smokers compared to ever smokers by National Health Interview Survey baseline survey year, 1991-2014.
