

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: List of proteins identified by LCMS/MS in clinically unaffected (CUS) and clinically affected skin (CAS) secretome.

File name: Supplementary Data 2

Description: Label free quantification of proteins identified with at least two peptides in clinically unaffected (CUS) and clinically affected (CAS) skin secretome.

File name: Supplementary Data 3

Description: Protease and protease inhibitors identified in clinically unaffected (CUS) and clinically affected (CAS) skin classified using functional annotation integrated in PantherDB.

File name: Supplementary Data 4

Description: The source data behind the graphs in the main and Supplementary Figures.
