

Additional file 1 - SPIRIT-Outcomes 2022 Checklist (for combined completion of SPIRIT 2013 and SPIRIT-Outcomes 2022 items)

Section	Item	SPIRIT 2013 Item	SPIRIT-Outcomes 2022 item	Location Reported
Administrative in	nformation	l		
Title	1	Descriptive title identifying the study design, population, interventions, and, if applicable, trial acronym	-	1
	2a	Trial identifier and registry name. If not yet registered, name of intended registry	-	4
Trial registration	2b	All items from the World HealthOrganization Trial RegistrationData Set	-	N/A
Protocol version	3	Date and version identifier	-	Left header
Funding	4	Sources and types of financial, material, and other support	-	4
	5a	Names, affiliations, and roles of protocol contributors	-	1-2
	5b	Name and contact information for the trial sponsor	-	2
Roles and responsibilitie s	5c	Role of study sponsor and funders, if any, in study design; collection, management, analysis, and interpretation of data; writing of the report; and the decision to submit the report for publication, including whether they will have ultimate authority over any of these activities	-	N/A
	5d	Composition, roles, and responsibilities of the coordinating centre, steering committee, endpoint adjudication committee, data management team, and other individuals or groups overseeing the trial, if applicable (see Item 21a for data monitoringcommittee)	-	1-2
Introduction			•	•
Background and rationale	6a	Description of research question and justification for undertaking the trial, including summary of relevant studies (published and unpublished) examining benefits and harms for each intervention	-	5-6
	6b	Explanation for choice of comparators	-	5-6
Objectives	7	Specific objectives or hypotheses	-	6

Section	Item No.	SPIRIT 2013 Item	SPIRIT-Outcomes 2022 item	Location Reported
Trial design	8	Description of trial design including type of trial (eg, parallel group, crossover, factorial, single group), allocation ratio, and framework (eg, superiority, equivalence, noninferiority, exploratory)	-	6
		Methods: Participants, interventions, and	l outcomes	
Study setting	9	Description of study settings (eg, community clinic, academic hospital) and list of countries where data will be collected. Reference to where list of study sites can be obtained	-	7
Eligibility criteria	10	Inclusion and exclusion criteria forparticipants. If applicable, eligibility criteria for study centres and individuals who will perform. the interventions (eg, surgeons, psychotherapists)	-	7
Interventions	11a	Interventions for each group withsufficient detail to allow replication, including how and when they will be administered. (for specific guidance see TIDieR checklist and guide)	-	9 (See Table 1)
	11b	Criteria for discontinuing or modifying allocated interventions for a given trial participant (eg, drug dose change in response to harms, participant request, or improving/worsening disease)	-	N/A
	11c	Strategies to improve adherence to intervention protocols, and any procedures for monitoring adherence (eg, drug tablet return, laboratory tests)	-	N/A
	11d	Relevant concomitant care and interventions that are permitted or prohibited during the trial	-	9 (See Table 1)
Outcomes	12	Primary, secondary, and other outcomes, including the specific measurement variable (eg, systolic blood pressure), analysis metric (eg, change from baseline, final value, time to event), method of aggregation (eg, median, proportion), and time point for each outcome. Explanation of theclinical relevance of chosen efficacy and harm outcomes is strongly recommended	-	10-12 (See Table 2)

Section	Item No.	SPIRIT 2013 Item	SPIRIT-Outcomes 2022 item	Location Reported
	12.1		Provide a rationale for the selection of the domain for the trial's primary outcome	10
	12.2		If the analysis metric for the primary outcome represents within- participant change, define, and justify the minimal important change in individuals	14
	12.3		If the outcome data collected are continuous but will be analyzed as categorical (method of aggregation), specify the cutoff values to be used	N/A
	12.4		If outcome assessments will be performed at several time points after randomization, state the time points that will be used for analysis	12 (See Figure 2)
	12.5		If a composite outcome is used, define all individual components of the composite outcome	N/A
Participa nt timeline	13	Time schedule of enrolment, interventions (including any run- ins and washouts), assessments, and visits for participants. A schematic diagram is highly recommended (see Figure)	-	12 (See Figure 2)
Sample size	14	Estimated number of participants needed to achieve study objectives and how it was determined, including clinical and statistical assumptions supporting any sample size calculations	-	14
	14.1		Define and justify the target difference between treatment groups.(eg, the minimal important difference)	14
Recruitment	15	Strategies for achieving adequateparticipant enrolment to reach target sample size	-	8
Methods: Assig	gnment of int	erventions (for controlled trials)		
Allocation:				
Sequence generatio n	16a	Method of generating the allocation sequence (eg, computer-generated random numbers), and list of any factors for stratification. To reduce predictability of a random sequence, details of any planned restriction (eg, blocking) should be provided in a separate document that is unavailable to those who enroll participants orassign interventions	-	13

Section	Item No.	SPIRIT 2013 Item	SPIRIT-Outcomes 2022 item	Location Reported
Allocation concealment mechanism	16b	Mechanism of implementing the allocation sequence (eg, central telephone; sequentially numbered, opaque, sealed envelopes), describing any steps to conceal the sequence until interventions are assigned	-	13
Implementation	16c	Who will generate the allocationsequence, who will enroll participants, and who will assignparticipants to interventions	-	8, 13
Blinding	17a	Who will be blinded after assignment to interventions (eg, trial participants, care providers,outcome assessors, data analysts), and how	-	13
(masking)	17b	If blinded, circumstances under which unblinding is permissible, and procedure for revealing a participant's allocated intervention during the trial	-	N/A
Methods: Data co	llection, ma	nagement, and analysis		
Data collection methods	18a	Plans for assessment and collection of outcome, baseline, and other trial data, including any related processes to promote data quality (eg, duplicate measurements, training of assessors) and a description of study instruments (eg, questionnaires, laboratory tests) along with their reliability and validity, if known. Reference to where data collection forms can be found, if not in the protocol	-	10-12 (See Figure 2)
	18a.1		Describe what is known about the responsiveness of the study instruments in a population similar tothe study sample	
	18a.2		Describe who will assess the outcome (eg, nurse, parent)	13
	18b	Plans to promote participant retention and complete follow-up, including list of any outcome datato be collected for participants who discontinue or deviate from intervention protocols	-	N/A

Section	Item No.	SPIRIT 2013 Item	SPIRIT-Outcomes 2022 item	Location Reported
Data management	19	Plans for data entry, coding, security, and storage, including any related processes to promote data quality (eg, double data entry; range checks for data values). Reference to where details of data management procedures can be found, if not in the protocol	-	18
	20a	Statistical methods for analyzing primary and secondary outcomes.Reference to where other details of the statistical analysis plan can be found, if not in the protocol	-	13
Statistical methods	20a.1		Describe any planned methods to account for multiplicity in the analysis or interpretation of the primary and secondary outcomes (eg, coprimary outcomes, same outcome assessed at multiple time points, or subgroup analyses of an outcome)	13
	20b	Methods for any additional analyses (eg, subgroup and adjusted analyses)	-	13
	20c	Definition of analysis population relating to protocol non- adherence (eg, as randomized analysis), and any statistical methods to handle missing data (eg, multiple imputation)	-	13
Methods: Monitor	ing	-	·	1
Data monitoring	21a	Composition of data monitoring committee (DMC); summary of its role and reporting structure; statement of whether it is independent from the sponsor and competing interests; and reference to where further detailsabout its charter can be found, if not in the protocol. Alternatively, an explanation of why a DMC is not needed	-	12
	21b	Description of any interim analyses and stopping guidelines, including who will have access to these interim results and make the final decision to terminate thetrial	-	13
Harms	22	Plans for collecting, assessing, reporting, and managing solicited and spontaneously reported adverse events and other unintended effects of trial interventions or trial conduct	-	12

Section	N0.		SPIRIT-Outcomes 2022 item	Location Reported	
Auditing	23	Frequency and procedures for auditing trial conduct, if any, and whether the process will be independent from investigators and the sponsor		18	
		Ethics and dissemination			
Research ethics approval	24	Plans for seeking research ethicscommittee/institutional review board (REC/IRB) approval	-	17	
Protocol amendments	25	Plans for communicating important protocol modifications (eg, changes to eligibility criteria, outcomes, analyses) to relevant parties (eg, investigators, REC/IRBs, trial participants, trial registries, journals, regulators)	-	17	
Consent or	26a	Who will obtain informed consent or assent from potential trial participants or authorized surrogates, and how (see Item 32)	-	17	
assent	26b	Additional consent provisions for collection and use of participant data and biological specimens in ancillary studies, if applicable	-	N/A	
Confidentiality	27	How personal information about potential and enrolled participants will be collected, shared, and maintained in order to protect confidentiality before, during, and after the trial	-	18	
Declaration of interests	28	Financial and other competing interests for principal investigators for the overall trial and each study site -		18	
Access to data	29	Statement of who will have access to the final trial dataset, and disclosure of contractual agreements that limit such accessfor investigators	-	18	
Ancillary and post-trial care	30	Provisions, if any, for ancillary and post-trial care, and for compensation to those who suffer harm from trial participation	-	N/A	
Dissemination policy	31a	Plans for investigators and sponsor to communicate trial results to participants, healthcare professionals, the public, and other relevant groups (eg, via publication, reporting in results databases, or other data sharing arrangements), including any publication restrictions	-	17	
	31b	Authorship eligibility guidelinesand any intended use of professional writers	-	N/A	

Section	Item No.	SPIRIT 2013 Item	SPIRIT-Outcomes 2022 item	Location Reported
	31c	Plans, if any, for granting public access to the full protocol, participant-level dataset, and statistical code	-	17
Appendices	•			
Informed consent materials	32	Model consent form and other related documentation given to participants and authorized surrogates	-	See Additional File 3
Biological specimens	33	Plans for collection, laboratory evaluation, and storage of biological specimens for genetic or molecular analysis in the current trial and for future use in ancillary studies, if applicable	-	N/A

^aIt is strongly recommended that this checklist be read in conjunction with the SPIRIT (Standard Protocol Items: Recommendations for Interventional Trials) Statement paper for important clarification on the items. Amendments to the protocol should be tracked and dated. The SPIRIT checklist is copyrighted by the SPIRIT Group under the Creative Commons "Attribution-NonCommercial-NoDerivs 3.0 Unported" license and is reproduced with permission. ^bIndicates page numbers and/or manuscript location: to be completed by authors.
