Appendix

Table of content:

Appendix Figure S1 and legend.....	2
Appendix Figure S2 and legend.....	3

Appendix Figure S1

Appendix Figure S1. *Ex vivo* transduction of primary murine hepatocytes

- VCN of primary murine hepatocytes of the indicated strains transduced with VSV.G-LV or GP64-LV at the indicated MOI. Doses have been matched based on LV titers measured on 293T cells.
- Mean and SEM of normalized VCN values over 293T of VCN shown in A (n=2).

Appendix Figure S2

A

B

Appendix Figure S2. Characterization of immortalized LSEC

- A. Flow cytometry histograms showing the expression of CD31, CD144, CD34, CD45, and CD90 in primary human immortalized LSEC.
- B. Anti-human FVIII immunofluorescence image of primary human immortalized LSEC. Green: FVIII. Blue: DAPI (nuclei). Scale bar: 25 μ m.
