S1 Fig. Tissue area of *Kdm6a^tm1d/+* and *Kdm6a^+/+* littermates, normalized by femur length. *Kdm6a^tm1d/+* mice have decreased tissue area compared to *Kdm6a^+/+* even after adjustment for shorter femur lengths. *Kdm6a^+/+* n=12; *Kdm6a^tm1d/+* n=12. Blue circles: *Kdm6a^+/+*, red triangles: *Kdm6a^tm1d/+*. *p < 0.05, two-tailed unpaired Student's t-test. All error bars represent mean ± 1 SD. TtAr, total area.
