

S3 Fig. Absence of off-target editing in *Kdm6a*^{+/+} and *Kdm6a*^{-/-} cell lines at top predicted exonic sites. Representative chromatogram traces from *Kdm6a*^{+/+} and *Kdm6a*^{-/-} lines are shown for: (A) *Dscaml1*, (B) *Minar1*, and (C) *Scn4b*. Purple line indicates predicted off-target Cas9 cleavage site.
