

Supplementary Fig. S2

Supplementary Figure S2. Cytokine secretion during CAR T-cell activation upon coculture with CD70⁺ RCC cells. Cytokines were measured using the Human Magnetic Luminex[®] Assay in supernatants collected at 0, 2, 4, 24, and 48 hr following coculture. LLoQ, lower limit of quantification; CTX130 R, CTX130 + Regnase-1 knockout; CTX130 T, CTX130 + TGF- β R2 knockout.
