

Supplemental Fig. S2: Analysis of ESX-2 system sections of *M. decipiens* and *M. riyadhense* by PCR. The two sections of the ESX-2 locus in *M. decipiens* (A) and *M. riyadhense* (B) are represented with the amplified PCR fragment annotated (C). The amplified fragments 1, 2, and 3 (C) were obtained with *M. decipiens* template DNA (two different samples), while the amplified fragments 4, 5, 6, and 7 (C) were obtained by using template DNA from *M. riyadhense*.

Mtb H37Rv

M. decipiens

M. riyadhense
