

SUPPLEMENTAL MATERIAL

Table S1. PedsQL 4.0 scores in comparison to a published large cohort of healthy and chronically ill children. Results are reported as mean (SD).

	Psychosocial Health Summary Score, mean (SD)	Physical Health Summary Score, mean (SD)	Total Score, mean (SD)
Child and Teen Report, current study (n=56)	72.5 (20.2)	76.2 (18.5)	73.8 (18.5)
Varni et al.* Healthy Children (N=5079)	81.8 (14.0)	87.8 (13.1)	83.9 (12.5)
P-value to current study	0.0002	<0.0001	<0.0001
Varni et al.* Chronic Conditions (N=574)	71.3 (17.1)	79.5 (10.1)	74.2 (15.4)
P-value to current study	0.63	0.15	0.87

Table S2. Proportion of cohort greater than one standard deviation lower than the mean score with comparison to a reference population [95% CI of proportion].

	Score	Current Study	Varni et al.*
Child and Teen Report	Psychosocial Score	10/56 (17.8%) [8.9-30.4%]	941/5963 (15.8%) [14.9-16.7%]
	Physical Health Score	11/56 (19.6%) [10.2-32.2%]	881/5962 (14.8%) [13.9-15.7%]
	Total Score	11/56 (19.6%) [10.2-32.2%]	1010/5972 (16.9%) [16.0-17.9%]
Parent and Child/Teen Report	Psychosocial Score	9/56 (16.1%) [7.6-28.0%]	1802/10071 (17.9%) [17.2-18.7%]
	Physical Health Score	9/56 (16.1%) [7.6-28.0%]	1722/10050 (17.1%) [16.4-17.9%]
	Total Health Score	11/56 (17.8%) [8.9-30.4%]	1840/10070 (18.3%) [17.5-19.0%]
