

S6 Table. Pregnancies included in the CDC4G trial based on gestational week, OGTT dates and GDM status

Pregnancies	2017	Study period (2018)	2019
No OGTT		No OGTT and $\geq 28+0$ GW [†]	2018 population followed 90 days post-partum [§]
OGTT	GDM and $\leq 23+6$ GW [*]	OGTT [‡]	

GDM=gestational diabetes mellitus. GW=gestational week. OGTT=oral glucose tolerance test.

*All pregnancies diagnosed with GDM during 2017, but not passed 23+6 gestational week 2018-01-01 are included in the OGTT population.

†All pregnancies without an OGTT from 28+0 gestational weeks on 2018-01-01 up to 2018-12-31 are included in the non- OGTT group.

‡All pregnancies with an OGTT during 2018-01-01—2018-12-31 are included in the OGTT group unless the indication for the OGTT is polyhydramnios, suspected LGA or OGTT $\geq 36+0$ without information on indication, in which case the original group is maintained.

§Pregnancies included in the trial during the later study periods (months) will be followed until 90 days after birth. Last birth 4th of august 2019.
