

Formulating search statements

(low level laser therapy OR phototherapy laser OR biostimulation laser OR photobiomodulation therapy) AND recurrent aphthous stomatitis.

Population	Patient with recurrent aphthous ulcer
Intervention	Low-level laser therapy
Control	Placebo and medication
Outcome	Reduced pain score and healing time

Database searched: Pubmed, ScienceDirect and Scopus

Date of search: 1 January 1967 to 30 June 2022

Language restriction: English

We contact no individuals or organizations since the information required was assessed based on the article published.

Search strategy was documented in excel as below.

Records marked as ineligible by automation tools based on types of studies. Validated RCT filter were used to exclude study with different design.
