

Supplementary Figure 4. Untargeted lipidomics reveal the induction of autophagy uniquely through RARRES2/GPR1 axis.

- A: Heatmap showing the differential mitochondrial lipid analysis.
 B: Heatmap showing the differential PE lipid analysis.
 C: LC3B staining of UOK101 cells with *GPR1* knockout.
 D: LC3B staining of UOK101 cells with *CMKLR1* knockout.
 E: LC3B staining of UOK101 cells with *RARRES2* knockout.
