

Supplemental Figure 2: Cytokine/chemokines increased or decreased after therapy in individual patients with the IO panel. The axes are log2 transformation of **i**: M10101, **ii**: M10103, **iii**: M10104, **iv**: M10105, **v**: M10106, **vi**: M10107, **vii**: M10108 (pre vs post 1st injection), **viii**: M10108 (pre vs post 2nd injection), **ix**: M10108 (pre 2nd injection (~4 weeks post 1st injection) vs post 2nd injection). On the axes are the relative Normalized Protein eXpression (NPx) values provided by Olink on the log2 scale.
