

Supplementary Figure 14

Supplementary Figure 14. Western blot analysis of MET and ERK1/2 phosphorylation in *MET* R1170Q cell models. MET and ERK1/2 phosphorylation in (A) Ba/F3 cells stably transduced with *MET* R1170Q and (B) 293T cells transiently overexpressing *MET* R1170Q. Cells were treated with MET TKIs at the indicated dose for Ba/F3 cells or at 1 μ M for 293T cells.
