

Supplementary Figure 4. Type and frequency of *MET* TKD mutations across cancer types in cohort #1. (A) Frequency of *MET* TKD mutations in various cancer types in cohort #1 according to OncoKB status; the numbers above each bar indicate the number of cases with *MET* TKD mutations (regardless OncoKB annotations) out of the total of cases of each cancer type. (B) Detailed oncogenic / likely oncogenic *MET* TKD mutations according to cancer type in cohort #1. Abbreviation: SCLC: small cell lung cancer, NSCLC: non-small cell lung cancer, CUP: cancer of unknown primary, GU: genitourinary, GIST: gastrointestinal stromal tumors, GI: gastrointestinal, HCC: hepatocellular carcinoma. *Others: Adenocarcinoma NOS (not otherwise specified).
