

Study Title: UCARE - Understanding CARdiac Events in Breast Cancer .A Pilot Cardio-Oncology Assessment and Surveillance Pathway for Breast Cancer Patients as an Intervention For The Early Detection of Cancer Treatment Related Cardiac Dysfunction(CTRCD)

Patient Details: *insert patient details here*

Dear *(Insert medical oncologist details here)*

Your patient (*name & board number*) has been enrolled on the UCARE study and as part of this study has had a Heart Failure Association – International Cardio-Oncology Society (HFA-ICOS) risk assessment performed.

This letter is to inform you that the HFA-ICOS risk assessment has indicated that this patient is at HIGH RISK of developing CTRCD as a result of their planned treatment with (*insert chemotherapy/Herceptin details here*).

As part of the UCARE study they have been allocated to a high risk surveillance pathway in line with European Society of Cardiology Guidelines

<https://academic.oup.com/eurheartj/article/43/41/4229/6673995>

These guidelines also recommend that high risk patients have a cardiology assessment prior to commencing treatment

Please do not hesitate to contact us if any further information is required.

Kind Regards

UCARE Investigators

Prof Aoife Lowery

Prof Osama Soliman
