

Supplementary Fig. 1 Map of Portugal with the incidence of serogroup B invasive meningococcal disease in the period 2012-2020 by geographical region. Geographical regions were classified according to the Nomenclature of Territorial Units for Statistics (NUTS III). The curves are presented in three colours: red for regions of high incidence (Incidence above the 85 percentile); orange for intermediate incidence (Incidence between percentiles 76 and 85), and yellow for low incidence (Incidence between percentiles 50 and 75)
