

With abdominal CT/MRI examinations during 2008 and 2019
N= 980,389 patients // 1,713,401 examinations

With CP feature during 2008 and 2019
N = 63,753 patients // 100,907 examinations

Age <18 or age >=85:
14487 examinations
Less than 1-year membership:
8262 examinations

Cohort for data pull
N = 48,563 patients // 75,018 examinations

Pancreatic cancer prior to examination (dx or cancer registry)
1754 examinations
Less than 30-day follow-up
2990 examinations

N = 46,041 patients // 70,274 examinations

Study cohort
Randomly select one examination for each patient
N = 46,041 patients // 46,041 examinations
