

Figure S4. Eicosanoid pathway gene expression in the epithelium or stroma of human pre-invasive disease and PDAC. Boxplots comparing gene expression of eicosanoid synthases (log₂(TPM+1)) in microdissected stroma and epithelium from PanIN or PDAC. *, p < 0.05; **, p < 0.01; ***, p < 0.001; ****, p < 0.0001.
