

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Table containing isolates codes, metadata, antimicrobial susceptibility profiles, and genomic analysis of samples from this study.

File Name: Supplementary Data 2

Description: Table containing data of strains used in the phylogenetic tree of figure 3. Data includes: tree order, strain name, year of isolation, country of origin, short read accession number, and reference.

File Name: Supplementary Data 3

Description: Table containing Single Nucleotide Variations for the maximum likelihood (ML) phylogenetic tree (figure 3) that was constructed from an alignment of 10,647 chromosomal SNVs.
