

Supplemental Table. Multivariable Logistic Regression Analysis of Demographic and Clinical Characteristics associated with UTI among Infants with at Least One Urine Culture Obtained

Characteristics	OR (95% CI)	p-value
Sex		
Female	(Reference)	—
Male	2.30 (2.15–2.45)	< 0.001
Gestational age (weeks)		
≤24	1.33 (1.19-1.48)	<0.001
25–28	1.24 (1.14-1.35)	<0.001
29–32	(Reference)	—
5-minute Apgar Score		
0–3	0.97 (0.86-1.10)	0.62
4–6	0.99 (0.91-1.07)	0.80
7–10	(Reference)	—
Vaginal delivery	1.18 (1.10-1.27)	<0.001
Prenatal steroids	1.18 (1.08-1.29)	<0.001
Length of hospitalization (days)	1.01 (1.01-1.01)	<0.001
CI = confidence interval; OR = odds ratio; UTI = urinary tract infection
