Abbreviations: ARTAG, age-related tau astrogliopathy; CBD, corticobasal degeneration; ALS, amyotrophic lateral sclerosis; FTLD, frontotemporal lobar degeneration; DLB, dementia with Lewy bodies; MS, multiple sclerosis; MSA, multiple system atrophy; n.a., not available; NFT, neurofibrillary tangles; PCA, posterior cortical atrophy; PD(D), Parkinson's disease (with dementia); PSP, progressive supranuclear palsy; PART, primary age-related tauopathy; -, absent.

**Supplemental Table 2:** Primary antibodies used in this study.

Name	Epitope	Source	RRID	Concentration	Dilution
AT8	Tau phosphorylated at Ser202/Thr205	Thermo Scientific, MA, USA	AB_223647	0.25 µg/ml	1:800
4G8	Amyloid-β <sub>17-24</sub>	BioLegend, San Diego CA	AB_2564633	n.a.	1:1000
LB509	Lewy bodies purified from patients with DLB	Thermo Scientific, MA, USA	AB_2920932	60 µg/ml	1:500
KM51	Full length (monoclonal antibody), NCL-ASYN	Novocastra, Leica	AB_442103	n.a.	1:250
Anti-pTDP	TDP phosphorylated at Ser409/410	Cosmo Bio USA, CA, USA	AB_1961900	n.a.	1:6000
Anti-p62	P62-lck ligand <sub>257-437</sub>	BD Biosciences, CA, USA	AB_398152	0.125 µg/ml	1:2000
