This supplementary material has been provided by the authors to give readers additional information about their work.

eMethods 1: Full Observational Health and Medicines Outcomes Partnership (OMOP)

concept list for heart attack

1) myocardial infarction, 2) old myocardial infarction, 3) old anterior myocardial infarction, 4) old inferior myocardial infarction, 5) acute myocardial infarction, 6) acute non-st segment elevation myocardial infarction, 7) acute st segment elevation myocardial infarction, 8) acute st segment elevation myocardial infarction involving left anterior descending coronary artery, 9) acute st segment elevation myocardial infarction due to right coronary artery occlusion, 10) acute st segment elevation myocardial infarction due to left coronary artery occlusion, 11) acute st segment elevation myocardial infarction, 12) acute subendocardial infarction, 13) acute myocardial infarction of anterior wall, 14) acute anterior st segment elevation myocardial infarction, 15) acute myocardial infarction of inferior wall, 16) acute myocardial infarction due to right coronary artery occlusion, 17) acute st segment elevation myocardial infarction due to right coronary artery occlusion, 18) acute myocardial infarction of anterolateral wall, 19) acute myocardial infarction of inferoposterior wall, 20) acute myocardial infarction of inferolateral wall, 21) acute myocardial infarction of lateral wall, 22) acute myocardial infarction due to left coronary artery occlusion, 23) acute st segment elevation myocardial infarction due to left coronary artery occlusion, 24) acute myocardial infarction of apical-lateral wall, 25) acute myocardial infarction of septum, 26) acute non-q wave infarction, 27) acute non-q wave infarction - widespread, 28) acute widespread myocardial infarction, 29) subendocardial myocardial infarction, 30) acute subendocardial infarction, 31) myocardial infarction due to demand ischemia, 32) subsequent myocardial infarction, 33) subsequent non-st segment elevation myocardial infarction, 34) subsequent st segment elevation myocardial infarction, 35) subsequent myocardial infarction of anterior wall, 36) subsequent myocardial infarction of

inferior wall, 37) true posterior myocardial infarction, 38) myocardial infarction in recovery phase, 39) non-q wave myocardial infarction, 40) heart attack

eMethods 2: Full Observational Health and Medicines Outcomes Partnership (OMOP)

concept list for stroke

1) thrombotic stroke, 2) cerebellar stroke syndrome, 3) cerebrovascular accident due to thrombus of basilar artery, 4) cerebrovascular accident due to thrombus of left carotid artery, 5) cerebrovascular accident due to thrombus of left middle cerebral artery, 6) cerebrovascular accident due to thrombus of right carotid artery, 7) cerebrovascular accident due to thrombus of right cerebellar artery, 8) cerebrovascular accident due to thrombus of right middle cerebral artery, 9) cerebrovascular accident due to thrombus of right posterior cerebral artery, 10) left posterior cerebral artery thrombosis with stroke, 11) embolic stroke, 12) cardioembolic stroke, 13) brainstem stroke syndrome, 14) posterior inferior cerebellar artery syndrome, 15) ischemic stroke, 16) occlusive stroke, 17) multi-infarct dementia, 18) multi-infarct dementia, uncomplicated, 19) multi-infarct dementia with delirium, 20) multi-infarct dementia with delusions, 21) multi-infarct dementia with depression, 22) occlusion of cerebral artery with stroke, 23) acute stroke, 24) progressing stroke, 25) basilar artery embolism with stroke, 26) cerebrovascular accident due to cerebral artery occlusion, 27) cerebrovascular accident due to occlusion of left posterior cerebral artery, 28) left posterior cerebral artery thrombosis with stroke, 29) left anterior cerebral artery embolism with stroke, 30) cerebellar stroke, 31) cerebral infarction due to stenosis of carotid artery, 32) cerebrovascular accident due to occlusion of left anterior cerebral artery, 33) cerebrovascular accident due to occlusion of left carotid artery, 34) left carotid artery embolism with stroke, 35) cerebrovascular accident due to occlusion of left vertebral artery, 36) left vertebral artery embolism with stroke, 37) cerebrovascular accident due to right carotid artery occlusion, 38) right carotid artery embolism with stroke, 39) cerebrovascular accident due to right carotid artery stenosis, 40) cerebrovascular accident due to

right vertebral artery occlusion, 41) right vertebral artery embolism with stroke, 42) cerebrovascular accident due to stenosis of left vertebral artery, 43) cerebrovascular accident due to thrombus of right vertebral artery, 44) cerebrovascular accident with intracranial hemorrhage, 45) chronic cerebrovascular accident, 46) cerebral infarction, 47) cerebral infarction due to thrombosis of cerebral arteries, 48) cerebral infarction due to thrombosis of middle cerebral artery, 49) cerebral infarction due to embolism of cerebral arteries, 50) infarction - precerebral, 51) cerebral infarct due to thrombosis of precerebral arteries, 52) cerebral infarction due to embolism of precerebral arteries, 53) cerebral infarction due to embolism of middle cerebral artery, 54) cerebral infarction due to occlusion of precerebral artery, 55) cerebral infarction due to occlusion of basilar artery, 56) cerebral infarction due to carotid artery occlusion, 57) cerebral infarction due to vertebral artery occlusion, 58) infarct of cerebrum due to iatrogenic cerebrovascular accident, 59) lacunar infarction, 60) acute lacunar infarction, 61) lacunar ataxic hemiparesis, 62) multiple lacunar infarcts, 63) pure motor lacunar infarction, 64) pure sensory lacunar infarction, 65) cerebral infarction due to cerebral venous thrombosis, 66) cerebral infarction due to cerebral venous thrombosis, non-pyogenic, 67) anterior cerebral circulation infarction, 68) anterior choroidal artery syndrome, 69) cerebral infarction due to cerebral artery occlusion, 70) infarction of basal ganglia, 71) hemorrhagic cerebral infarction, 72) mixed cortical and subcortical vascular dementia, 73) occipital cerebral infarction, 74) pituitary apoplexy, 75) right sided cerebral infarction, 76) thalamic infarction.

eMethods 3: Full description of the statistical model

We opted not to specify pre-set parameters for the spline. Instead, we left the function to automatically determine the optimal parameters. Overall, the model can be expressed as:

$$\begin{aligned} h(t|X) = & h_0(t|age, sex, race, household\ income, contextual\ deprivation) \exp(\beta_1(BMI) \\ & + \beta_2(health\ insurance\ status) + \beta_3(hypertension) + \beta_4(ASCVD) \\ & + \beta_5(smoking\ status) + \beta_6(type\ 2\ diabetes) + \gamma_1 s_1(PM_{2.5}) + \gamma_2 s_2(NO_2) \\ & + \gamma_3 s_3(Temperature)) \end{aligned}$$

where $s(*)$ indicates penalized splines. To adjust for residual autocorrelation within the geographic unit (i.e., 3-digit zip code in this study), we used the generalized estimating equation (GEE) to calculate a statistically robust CI for the effect estimates.

eTable 5. Descriptive statistics of PM_{2.5} exposure level in the study population

Subpopulations	PM _{2.5} exposure level ($\mu\text{g}/\text{m}^3$)						
	Min	Q1	Median	Mean	Q3	Max	SD
All	3.7	6.6	7.7	7.7	8.6	13.9	1.4
Less deprived	4.2	6.5	7.8	7.6	8.5	13.1	1.2
More deprived	3.7	6.9	7.5	7.9	9.1	13.9	1.5
Household income above \$50K	3.7	6.5	7.7	7.7	8.6	13.9	1.4
Household income under \$50K	3.7	6.8	7.8	7.8	8.9	13.9	1.3
Non-Hispanic White	3.7	6.5	7.5	7.6	8.5	13.9	1.3
Non-Hispanic Black	4.5	7.4	8.5	8.2	9.1	13.9	1.1

eTable 6. Hazard ratios and 95% confidence interval for heart attack in relation to PM_{2.5} exposure level with 6 µg/m³ as the reference level.

PM _{2.5} exposure level	All	Contextual deprivation		Household income		Race	
		Less deprived	More deprived	Above \$50K	Under \$50K	Non-Hispanic White	Non-Hispanic Black
