

Supplementary Table 1. Risk of periodic limb movements during sleep according to each parameter

Parameter	OR (95% CI) <sup>a)</sup>	P-value
Age	1.069 (1.061–1.076)	<0.001
BMI	0.961 (0.936–0.986)	0.003
TST	1.000 (0.999–1.002)	0.726
Male	-	<0.001 <sup>b)</sup>

OR, odds ratio; CI, confidence index; BMI, body mass index; TST, total sleep time.

<sup>a)</sup>Odds ratio were adjusted for the other parameters including the severity of obstructive sleep apnea. <sup>b)</sup>Chi-square test was used.
