

Supplementary Table 2. Risk of positional obstructive sleep apnea during sleep according to each parameter

Parameter	OR (95% CI) ^{a)}	P-value
Age	1.000 (0.996–1.005)	0.849
BMI	0.835 (0.821–0.850)	<0.001
TST	1.007 (1.006–1.008)	<0.001
Male	-	0.029 ^{b)}

OR, odds ratio; CI, confidence index; BMI, body mass index; TST, total sleep time.

^{a)}Odds ratio were adjusted for the other parameters including the severity of obstructive sleep apnea. ^{b)}Chi-square test was used.
