

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Individual sample coverage metrics across the 20 genes targeted by our panel for all 3,929 single time-point and serial samples.

File Name: Supplementary Data 2

Description: List of the 3,192 mutated sites evaluated and their TIER classification.

Legend: REF = reference allele; ALT = alternative allele; c.DNA = DNA sequence change; Alteration = amino acid change for the nonsynonymous mutations.
