

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Differentially methylated and expressed genes associated with Day of Life.

File Name: Supplementary Data 2

Description: Complete list of enriched reactome pathways in protein-protein interaction network

File Name: Supplementary Data 3

Description: Causal mediation analysis statistics

File Name: Supplementary Data 4

Description: All independent significant SNPs associated with NLR at r^2 0.6

File Name: Supplementary Data 5

Description: Results of ANNOVAR mapping between SNP associations and hg19 genomic features

File Name: Supplementary Data 6

Description: Summary of QC procedures
