Inclusion/Exclusion of hospitals: To identify the 50 hospitals in our final cohort, we reviewed charge data from a total of 95 hospitals. Of the 95 hospitals, 93 (98%) had a standard charge file on their website, and 58 (61%) had entries for indomethacin suppositories. We then excluded eight (8%) hospitals that had more than one entry for indomethacin suppositories or did not contain a cash price. The final list of included and excluded hospitals and their associated bed-sizes is in **eTable 1** and **eTable 2**, respectively, below. Median bed sizes were similar between included and excluded hospitals. Excluded hospitals were more likely to be in Florida, NY, and CA (**Figure 1** below).
