

Figure S1. Spearman's rank correlation coefficient between patient risk groups and urinary 8-OHdG levels was calculated (A) without or (B) with prostate volume correction. Risk group 0, benign; risk group 1, low/intermediate risk; risk group 2, high risk; risk group 3, locally advanced; risk group 4, nodal/metastatic. 8-OHdG, 8-hydroxydeoxyguanosine; CI, confidence interval.
