Section and topic	Checklist item	Page No.
ADMINISTRATIVE INF	ORMATION	
Title:		
Identification	Identify the report as a protocol	1
Update	If the protocol is for an update of a previous systematic review, identify as such	N/A
Registration	If registered, provide the name of the registry (such as PROSPERO) and registration number	2
Authors:		
Contact	Provide name, institutional affiliation, e-mail address of all protocol authors; provide physical mailing address of corresponding author	1
Contributions	Describe contributions of protocol authors and identify the guarantor of the review	18
Amendments	If the protocol represents an amendment of a previously completed or published protocol, identify as such and list changes; otherwise, state plan for documenting important protocol amendments	N/A
Support:		
Sources	Indicate sources of financial or other support for the review	18
Sponsor	Provide name for the review funder and/or sponsor	18
Role of sponsor or funder	Describe roles of funder(s), sponsor(s), and/or institution(s), if any, in developing the protocol	18
INTRODUCTION		
Rationale	Describe the rationale for the review in the context of what is already known	3-5
Objectives	Provide an explicit statement of the question(s) the review will address with reference to participants, interventions, comparators, and outcomes (PICO)	5
METHODS		
Eligibility criteria	Specify the study characteristics (such as PICO, study design, setting, time frame) and report characteristics (such as years considered, language, publication status) to be used as criteria for eligibility for the review	7 and Table 1. Selection Criteria
Information sources	Describe all intended information sources (such as electronic databases, contact with study authors, trial registers or other grey literature sources) with planned dates of coverage	7
Search strategy	Present draft of search strategy to be used for at least one electronic database, including planned limits, such that it could be repeated	Appendix 2.
Study records:		

Appendix 1. PRISMA-P (Preferred Reporting Items for Systematic review and Meta-Analysis Protocols) 2015 checklist

Data management	Describe the mechanism(s) that will be used to manage records and data throughout the review	7
		,
Selection process	State the process that will be used for selecting studies (such as two independent reviewers) through each phase of the review (that is, screening, eligibility and inclusion in meta-analysis)	7-8
Data collection process	Describe planned method of extracting data from reports (such as piloting forms, done independently, in duplicate), any processes for obtaining and confirming data from investigators	8
Data items	List and define all variables for which data will be sought (such as PICO items, funding sources), any pre-planned data assumptions and simplifications	6, 8
Outcomes and prioritization	List and define all outcomes for which data will be sought, including prioritization of main and additional outcomes, with rationale	6, 8
Risk of bias in individual studies	Describe anticipated methods for assessing risk of bias of individual studies, including whether this will be done at the outcome or study level, or both; state how this information will be used in data synthesis	8
Data synthesis	Describe criteria under which study data will be quantitatively synthesised	8-9
	If data are appropriate for quantitative synthesis, describe planned summary measures, methods of handling data and methods of combining data from studies, including any planned exploration of consistency (such as I^2 , Kendall's τ)	Ĩ
	Describe any proposed additional analyses (such as sensitivity or subgroup analyses, meta-regression)	
	If quantitative synthesis is not appropriate, describe the type of summary planned	
Meta-bias(es)	Specify any planned assessment of meta-bias(es) (such as publication bias across studies, selective reporting within studies)	e N/A
Confidence in cumulative evidence	Describe how the strength of the body of evidence will be assessed (such as GRADE)	N/A
