

Patients with CT examinations prior to surgery for Thymoma at our institution between January 2005 and November 2016 (n = 185 )

Excluded patients (n = 26 );  
Reasons are as follows;  
• Cases with plain CT only: n = 8  
• Contrast enhanced CT only: n = 3  
• Different timing of contrast-enhanced CT: n = 3  
• Dual energy CT: n = 12

**Final study population**  
(n = 159 [160 tumors])
