

Uncropped blots: Extended data Figure 2e

Membrane #1

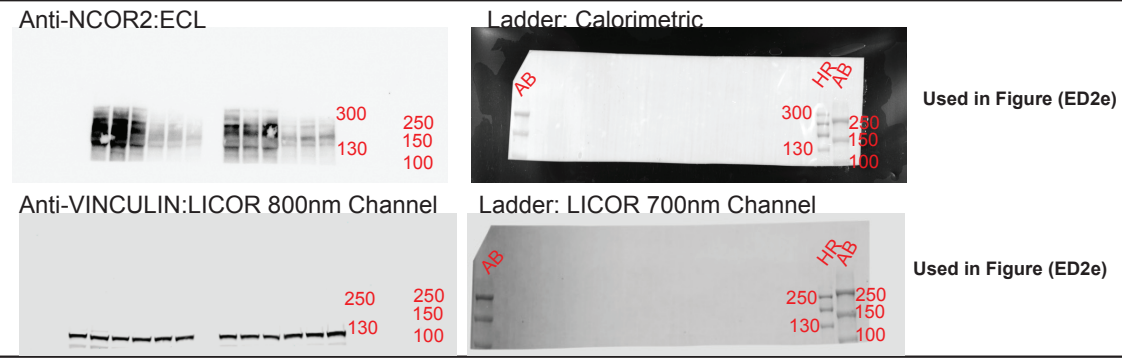

Samples:
 Same protein lysates were loaded into 4 separate gels. Each membrane was cut in half to accommodate blotting for high and low molecular weight proteins.

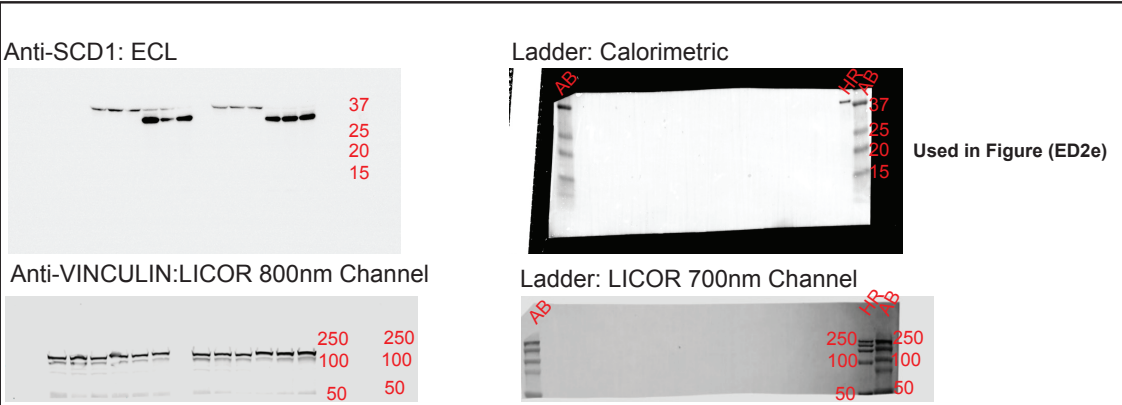

Ladders:
 HR: High Range 40-300 kDa
 AB: All Blue (10-250 kDa)

****Note:** HR bands 300 and 70 cannot be visualized by LICOR due to the dye. All bands are visible by calorimetric scan.

Membrane #2

Membrane #3

Membrane #4
