

Uncropped blots: Extended data Figure 8c

Membrane 1

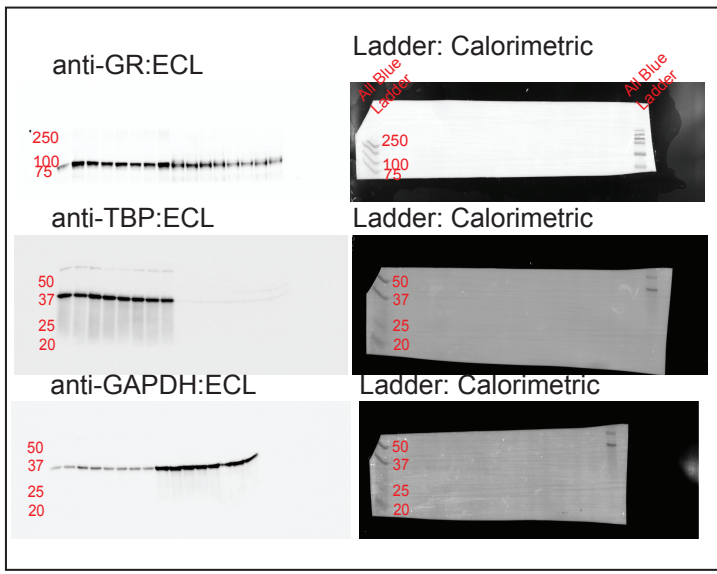

* USED in PANEL ED 8c

Samples:
Same protein lysates were loaded into 3 separate gels. Each membrane was cut in half to accommodate blotting for high and low molecular weight proteins.

Ladders:
HR: High Range 40-300 kDa
AB: All Blue (10-250 kDa)
**Note: HR bands 300 and 70 cannot be visualized by LICOR due to the dye. All bands are visible by calorimetric scan.*

Membrane 2

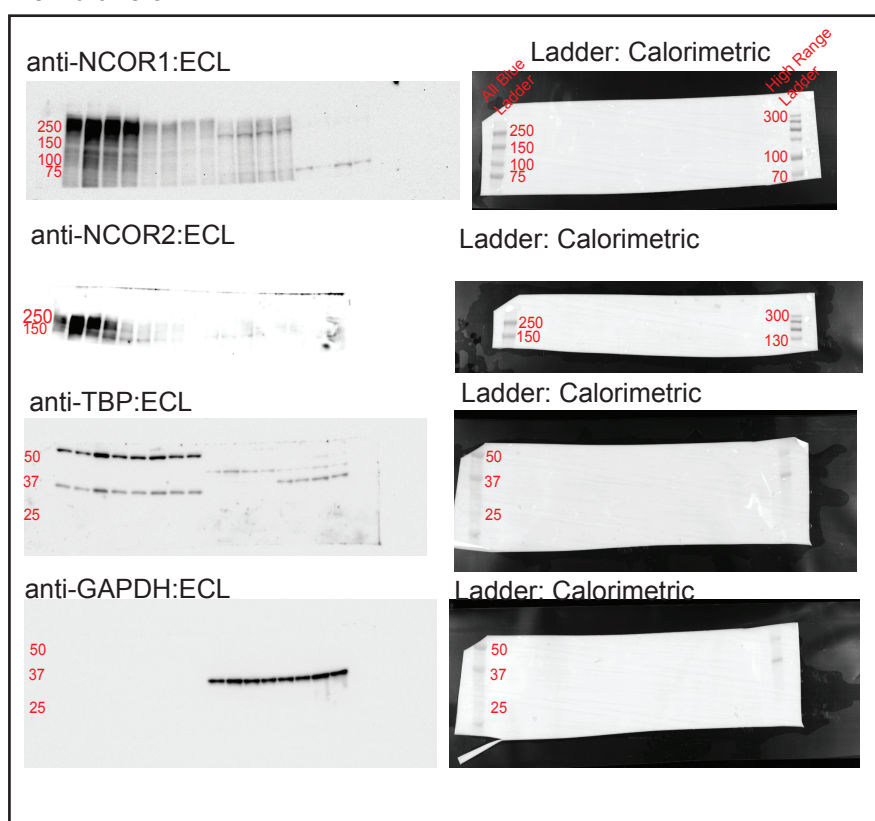

* USED in PANEL ED 8c

* USED in PANEL ED 8c

* USED in PANEL ED 8c

Membrane 3

* USED in PANEL ED 8c

* USED in PANEL ED 8c
