

**Extended Data Figure 4:** Visualization of the of protein abundance of the mitochondrial ETS complexes in the soleus. Blue indicates a greater protein abundance while red indicates a lower abundance. Gray proteins indicate that the protein were not detected in our analyses. The complexes were generated using complex IDs (CI: 7AK5 , CII: 1ZOY, CIII: 7TZ6, CIV: 7COH, and CV: 8H9V) from the RCSB Protein Data Bank and rendered using ChimeraX. The data are represented as mean from 5-7 rats per group.
