

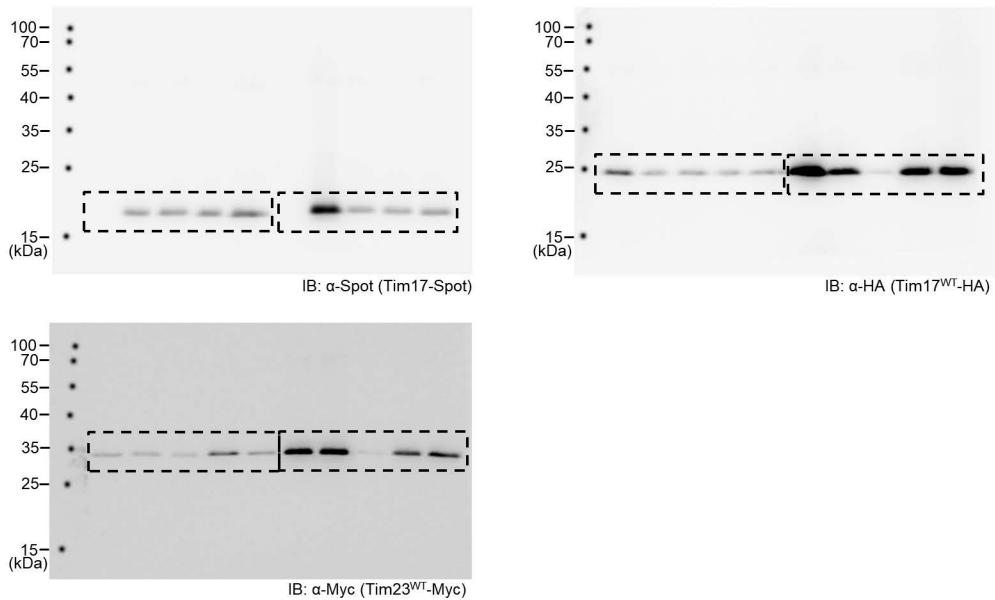

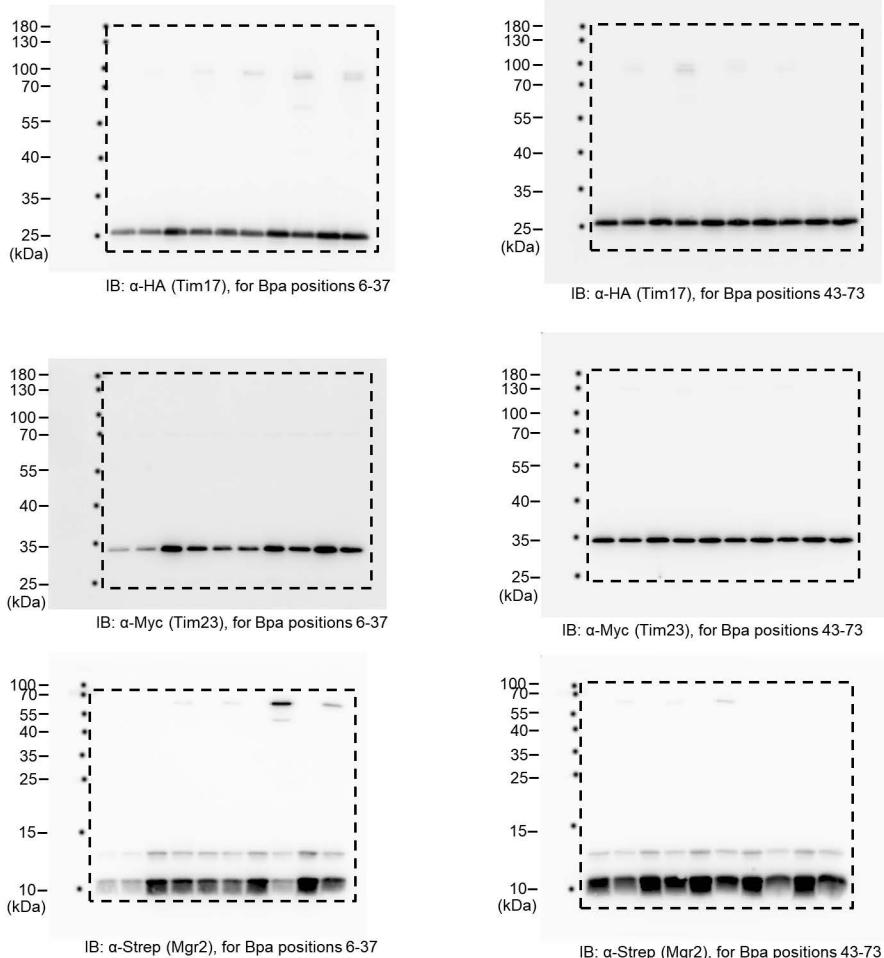

Fig. 2h

The Spot and HA blots in Fig. 2h are from the same membrane. The Myc blot is from a separate gel loaded with the same volume of the identical samples.

Fig. 3c

The HA and Myc blots in Fig. 3c are from the same membranes. The Strep blots are from separate gels loaded with the same volume of the identical samples used in the HA/Myc blots.

Extended Data Fig. 3a

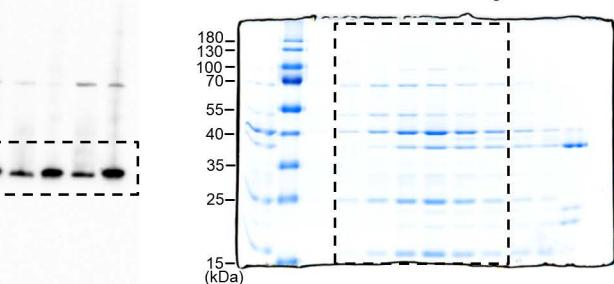

IB:  $\alpha$ -Tim44

Extended Data Fig. 3c

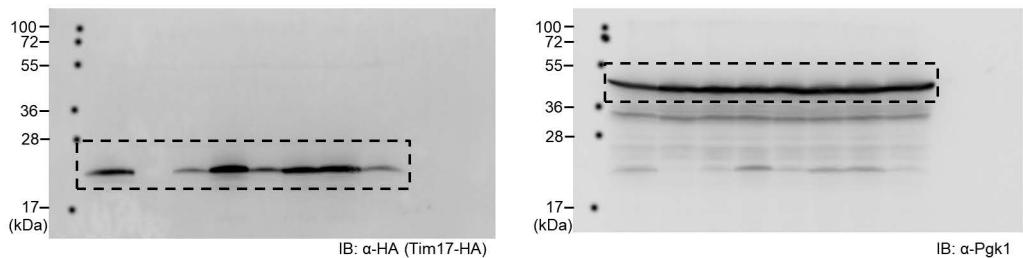

Extended Data Fig. 3d

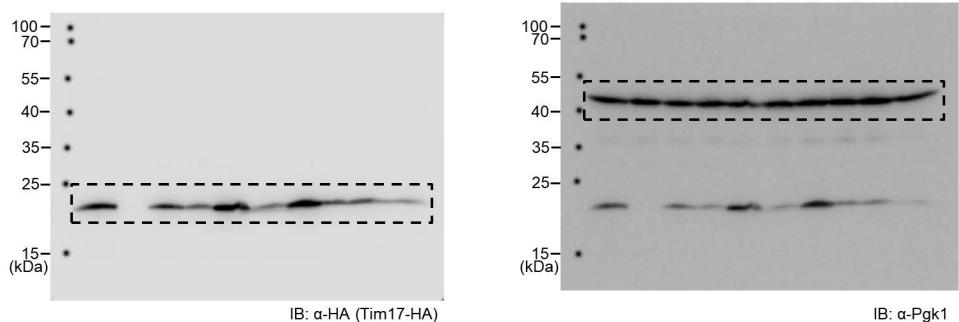

The Tim44 and Spot blots in Extended Data Fig. 3c  
are from the same membrane.

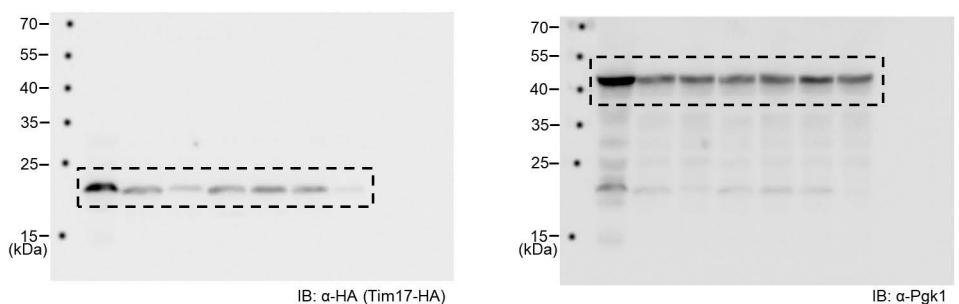

Extended Data Fig. 6b

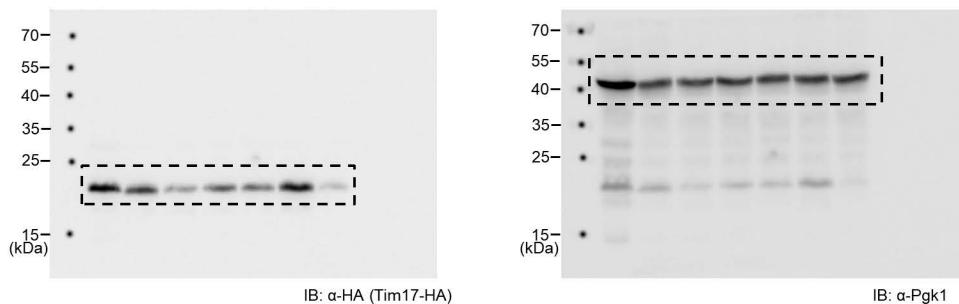

Extended Data Fig. 6c

Extended Data Fig. 6e

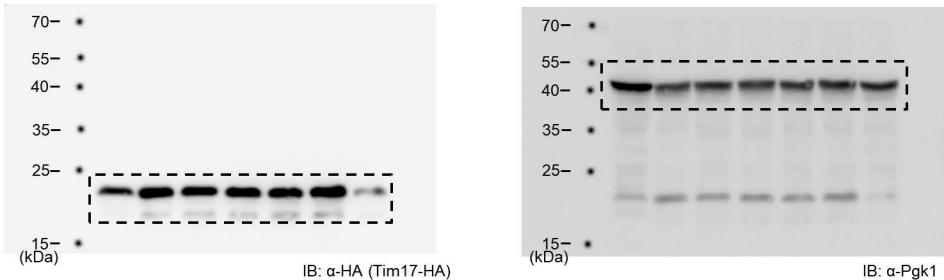

Extended Data Fig. 6f

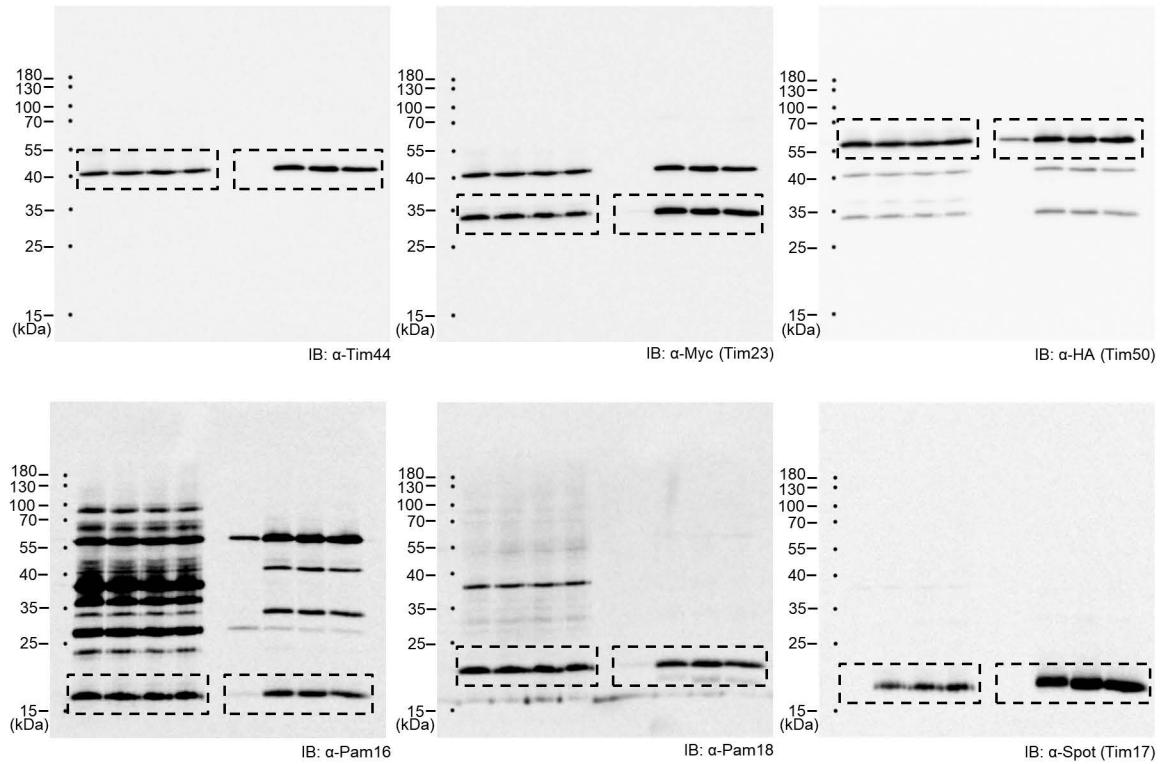

In each panel of Extended Data Fig. 6 b, c, e, and f, the HA and Pgk1 blots are from the same membrane.

Extended Data Fig. 6g

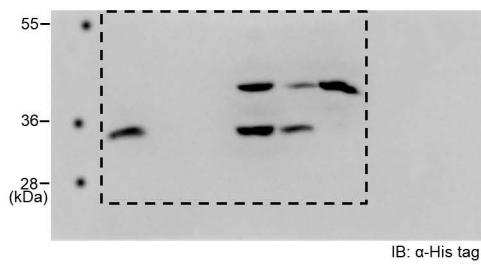

The HA and Pgk1 blots in Extended Data Fig. 6g are from the same membrane.

Extended Data Fig. 6h

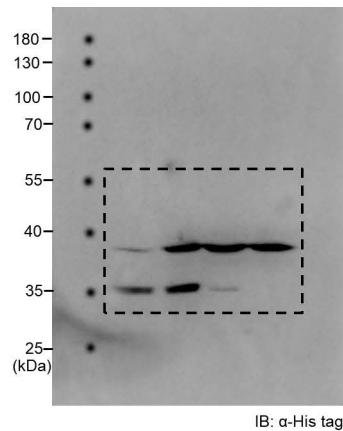

All blots in Extended Data Fig. 6h are from the same membrane.

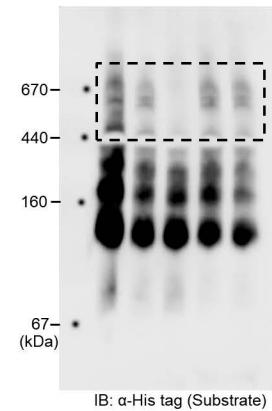

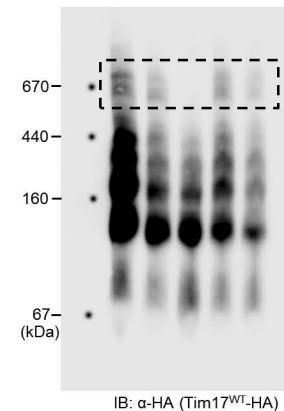

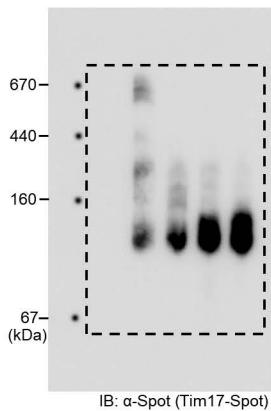

Extended Data Fig. 6i

Extended Data Fig. 6j

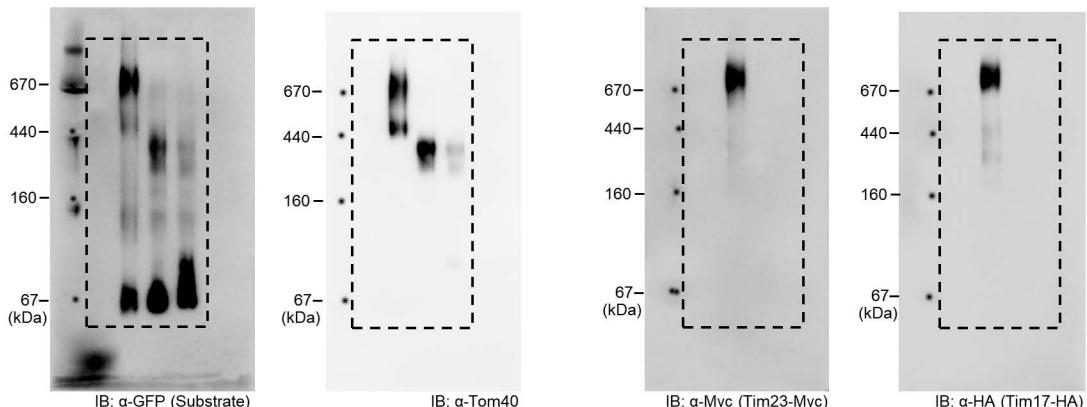

Extended Data Fig. 6k

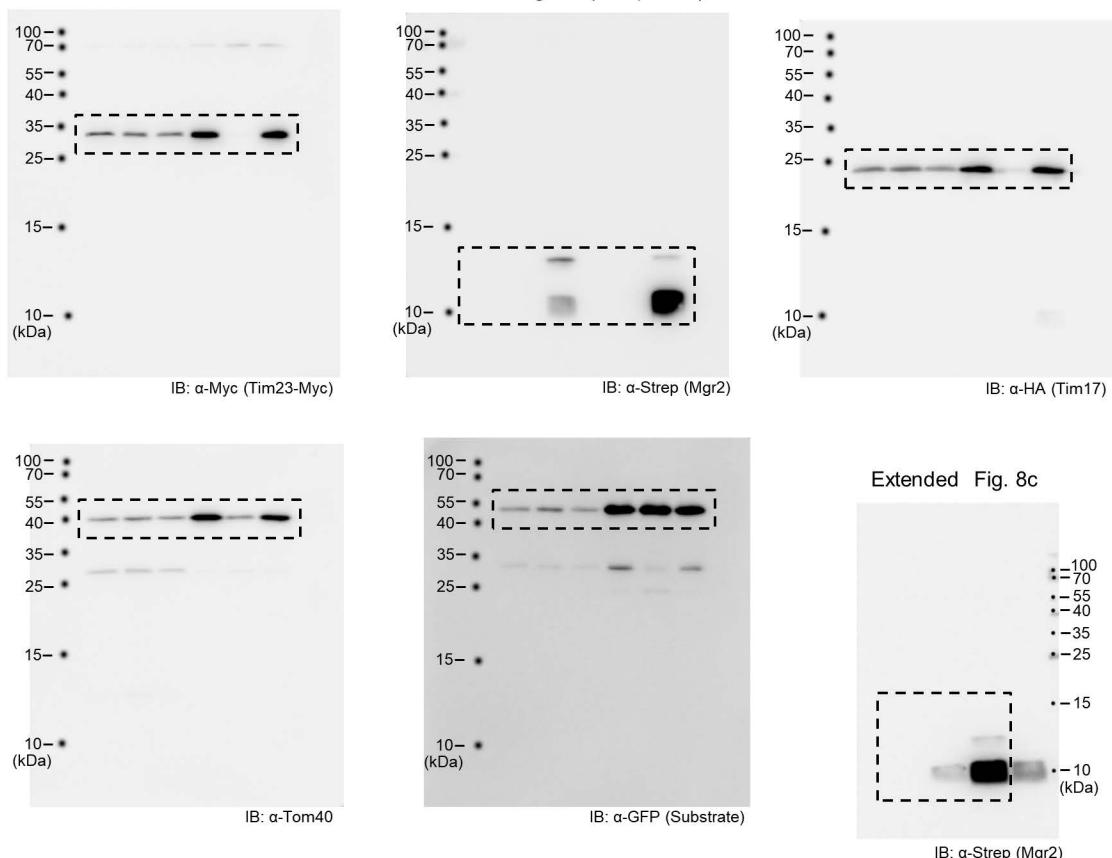

The Spot and HA blots in Extended Data Fig. 6k are from the same membrane.  
The His blot is from a separate gel loaded with the same volumes of the identical  
samples from the Spot/HA blots.

Extended Data Fig. 8a

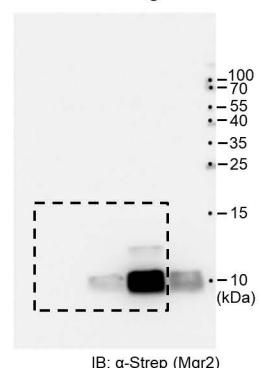

The GFP and Tom40 blots in the Extended Data Fig. 8a are from the same gel/membrane. The Myc and HA blots are from a separate membrane. The two membranes are from gels loaded with the same volumes of the identical samples.

Extended Fig. 8d (Left panels)

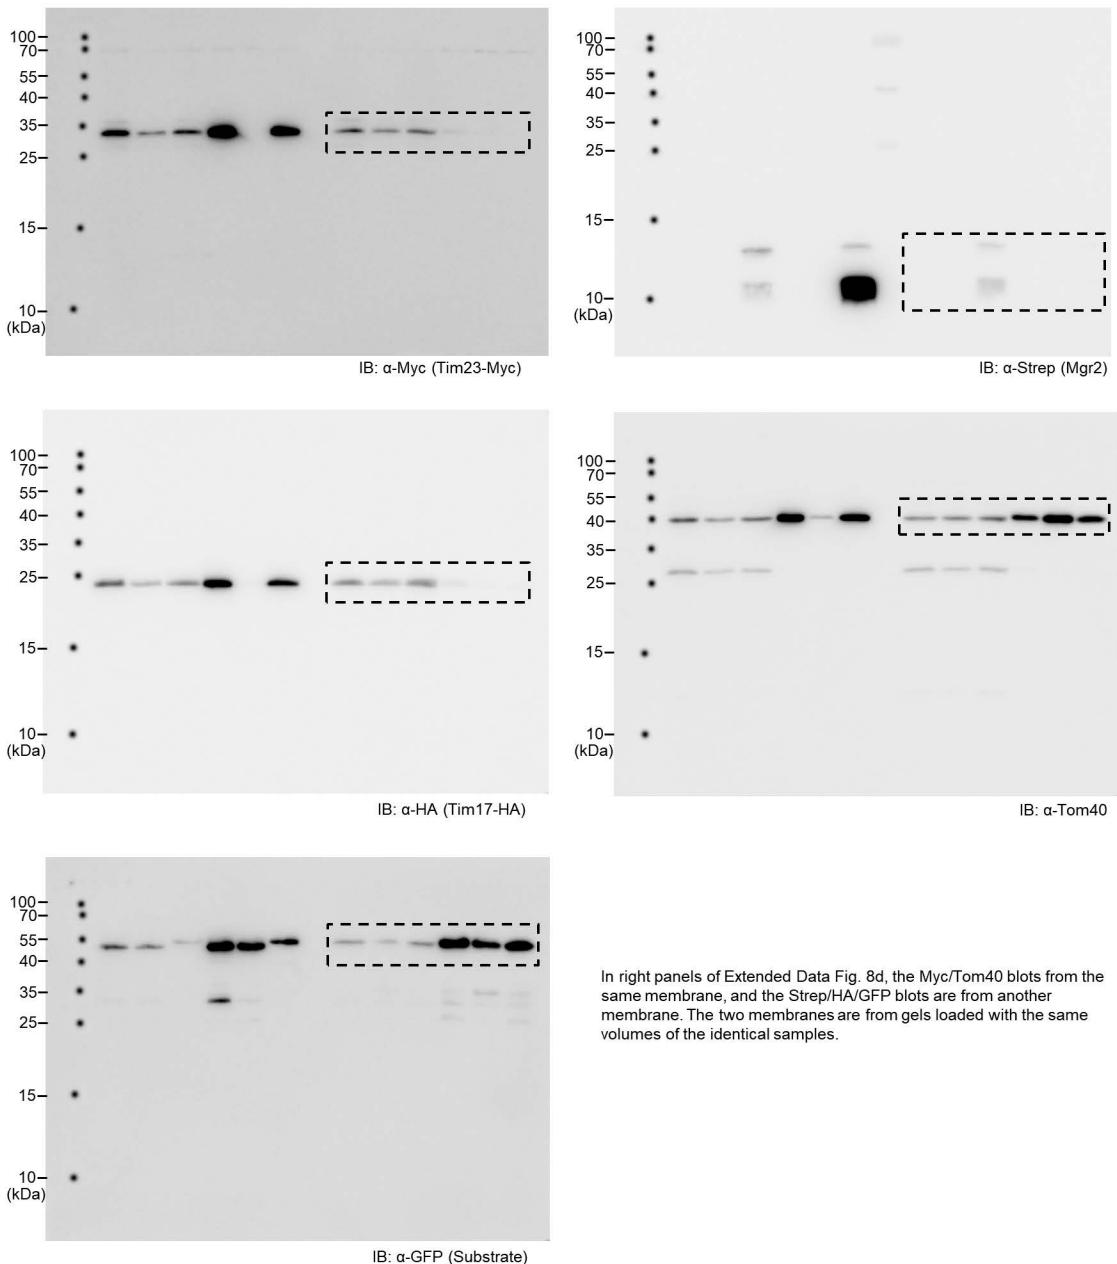

Extended Fig. 8c

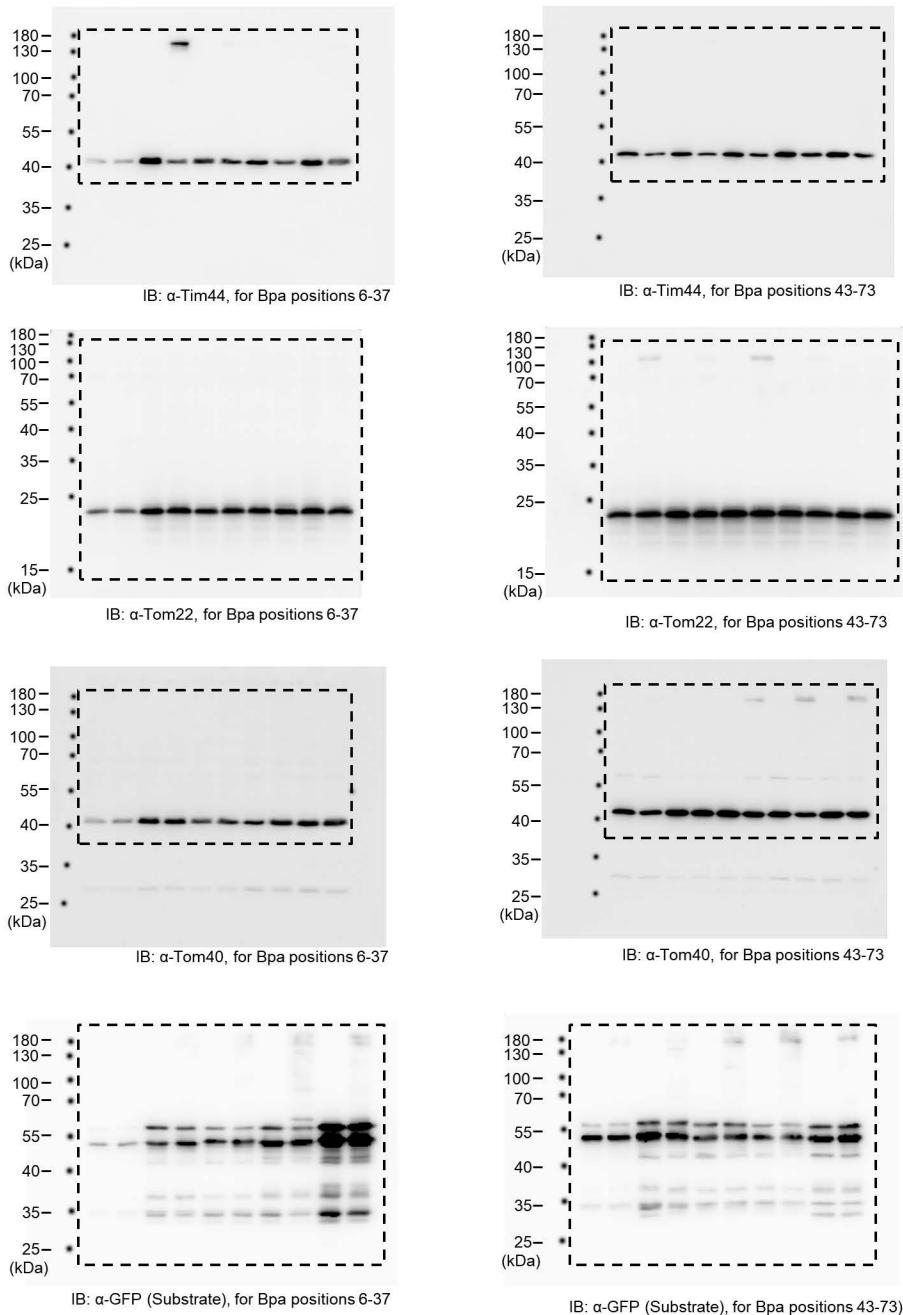

The Myc and Tom40 blots in the left panels of Extended Data Fig 8d are from the same membrane. The Strep, HA, and GFP blots are from another same membrane. Both membranes are from gels loaded with the same volumes of the identical samples.

Extended Data Fig. 8d (Right panels)

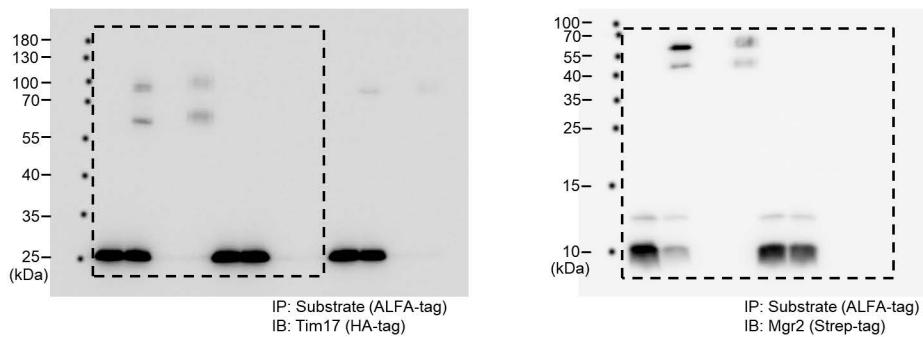

Extended Data Fig. 8e

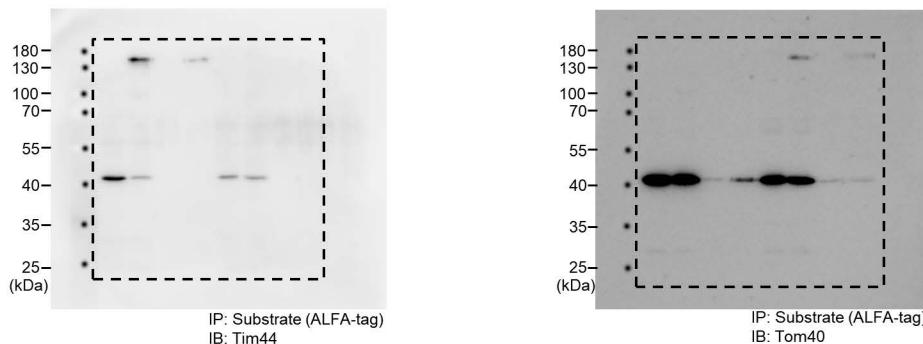

The Tim44, Tom40, and GFP blots in Extended Data Fig. 8e are from the same membrane, and the Tom22 blot is from a separate membrane. For all blots in Fig. 3c and Extended Data Fig. 8e, gels were loaded with same volumes of the identical samples.

### Extended Data Fig. 8f

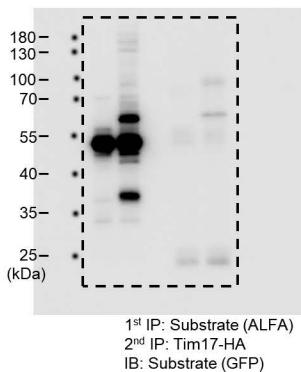

The HA and Strep blots of Extended Data Fig. 8f are from two separate gels loaded with same volume of identical samples.

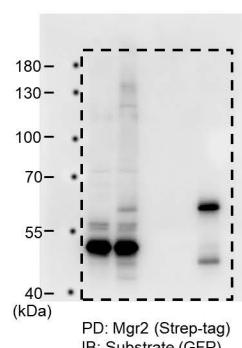

The Tim44 and Tom40 blots of the Extended Data Fig. 8f are from the same membrane.
