

**Author(s):**  
**Question:** Controlling adherence compared to no such intervention for managing PLWH with LLV  
**Setting:**  
**Bibliography:**

Certainty assessment							Impact	Certainty	Importance
N <sub>s</sub> of studies	Study design	Risk of bias	Inconsistency	Indirectness	Imprecision	Other considerations			
<b>Percentage of suboptimal adherence in PLWH with LMV</b>									
5	non-randomised studies	not serious	not serious	serious <sup>a</sup>	serious <sup>b</sup>	none	Percentage of suboptimal adherence in PLWH with LMV 38.05% (95%CI 32.7-43.3)	⊕○○○ Very low	IMPORTANT

CI: confidence interval

**Explanations**

- a. Does not answer directly the study question
- b. Wide confidence intervals
