

Supplementary Figure S2

Supplementary Figure S2. SUMOylation of Las1L. (A) SUMOylation of Las1L deletion mutants. H1299 cells transfected with WT Las1L or its deletion mutants in the absence or presence of His-SUMO2 were subjected to Ni²⁺-NTA PD followed by IB to detect Las1L SUMOylation. The SUMOylated WT Las1L and its fragment are indicated. The protein expression is shown at the bottom panel. **(B)**. Las1L is SUMOylated at K565. H1299 cells transfected with the indicated plasmids were subjected to Ni²⁺-NTA PD followed by IB to detect Las1L SUMOylation. The SUMOylated Las1L is indicated. The protein expression is shown at the bottom panels.
