

utilization of dental services 11

I am Stephen Ojok, studying at Lira University. I am doing a research on Utilization of Dental services and associated factors among adults 18-45 years in Lira District since Dental diseases are very common in this country and in this region. I am going to give you information and invite you to be part of this research. You do not have to decide today whether or not you will participate in the research. Before you decide, you can talk to anyone you feel comfortable with about the research. Participants will be given the informed consent form to fill in case they accept to participate in the study. The interviewer will then ask the participant to find a convenient place to administer the questionnaire. The interview will take about 15-20 minutes. If you have any questions related to the study as a research participant, you can contact the principal investigator, OJOK STEPHEN on telephone number+256777809652 or via email on ojokstephen80@gmail.com . Do you accept to participate in the study
