DAS28-CRP high-responder defined as the 50 samples with the greatest decrease in DAS28-CRP, versus low responders with the least decrease.

Oxylipin values are changes from baseline to 6 months (6 month minus baseline)

*p<0.05 between means

Values are Mean(SEM)

%Values represented as $\text{Log}_{10}(x+1) \times 10^3$

Additional missingness of data in some oxylipins (6k PGF1α, TXB2, PGE2, LXA4, 6trans12epi LTB4 + LTB4).
