

**Table S2.** Contrast Sensitivity and Visual Field Assessments at Month 24

	<b>Lower BCVA subgroup (n=170)</b>	<b>Higher BCVA subgroup (n=31)</b>	<b>Overall (N=201)</b>
<b>Pelli-Robson contrast sensitivity score</b>			
n	119	23	142
Mean (SD)	0.88 (0.47)	1.49 (0.32)	0.98 (0.50)
n	119	23	142
Change from baseline, mean (SD)	-0.03 (0.22)	0.04 (0.20)	-0.02 (0.22)
<b>Volume of full field hill of vision (dB-steradians)</b>			
n	47	15	62
Mean (SD)	18.76 (19.80)	27.25 (19.23)	20.81 (19.85)
n	42	13	55
Change from baseline, mean (SD)	-1.01 (4.67)	0.03 (5.83)	-0.77 (4.93)

Visual fields were only assessed at sites with access to perimetry equipment

BCVA = best-corrected visual acuity; dB = decibel; SD = standard deviation

Lower BCVA subgroup = 34–73 ETDRS letters

Higher BCVA subgroup =  $\geq 74$  ETDRS letters
