

Supplementary FigureS3

Supplementary Figure S3. mRNA expression of Pd-I1, Ttp, and Ksrp in C26 and LM4 cells. mRNA expression analysis conducted via RNA sequencing (left graph) and qPCR (middle and right graphs). ** $p < 0.01$ and * $p < 0.05$; t-test. ns = not significant. p-values: 0.0050 (Cd274, Pd-I1), 0.0176 (Pd-I1), and 0.0911 (Ttp) by paired t-test.
