

Supplementary FigureS2

Supplementary Figure S2. mRNA expression of Nlrp3, Sting, and mTOR in C26 and LM4 cells. Total RNA was extracted and analyzed via RNA sequencing. \*\* $p < 0.01$  and \* $p < 0.05$ ; t-test. ns = not significant.  $p = 0.0052$  (Nlrp3),  $0.0099$  (Sting), and  $0.0291$  (mTOR) by paired t-test.
