

**Supplemental Figure S3: Venetoclax has minimal effects on the efficacy of MRTX1133 on 2D 'high' confluent 2D tissue culture plastic.** PDAC cells were plated at 'high' confluent ( $10 \times 10^3$  cells/well) in 96-well plates for 24 hours and treated with MRTX1133 (0.25 $\mu\text{M}$ , 0.5 $\mu\text{M}$ , 1.0 $\mu\text{M}$ ) and co-treated with DMSO or Venetoclax (2.5 $\mu\text{M}$ ) for 72 hours. Cell viability was determined by MTT assay. Error bars  $\pm$  SD, n=3, unpaired t-test. \*, p<0.05; ns, not significant.
