Supplementary Results

Supplementary Figure i.

Supplementary Figure i.

Intraobserver levels of Agreement in Quantitative Analysis of ^{18}F-GP1 Uptake.

Figures show mean standardised uptake values (SUV$_{mean}$; first row A-C), mean target to background ration (TBR$_{mean}$; second row d-f), for coronary artery (first column), carotid arteries (second column) and brain (third column).

ICC = intraclass correlation coefficient, LOA= Limits of agreement.

Please note the difference in x-axis scale for brain TBR$_{mean}$.

Supplementary Figure ii.

Supplementary Figure ii. Interobserver levels of Agreement in Quantitative Analysis of ^{18}F-GP1 Uptake.

Figures show mean standardised uptake values (SUV$_{mean}$; first row A-C), mean target to background ration (TBR$_{mean}$; second row D-F), for coronary artery (first column), carotid arteries (second column) and brain (third column).

ICC = intraclass correlation coefficient, LOA= Limits of agreement.

Please note the difference in x-axis scale for brain TBR$_{mean}$.
