**Table S4 Sequence of the extracellular domain of PDPN, relate to Figure 6 and Figure S7** (A) Sequences in bold are glycopeptides identified in this study using mass spectrometry. Sequences with glycosylation of tri-sialyl (red) or quadro-sialyl T (blue) structures are colored. (B) Identified sequences of PDPN-Fcs. Each underlined sequences indicate the corresponding PLAG domain (1, 2, 3 and 4). Quantitative values (Count) of sequences with glycosylation of tri-sialyl or quadro-sialyl T structure identified on PDPN-Fc from cells co-transfected with ST3-1, ST6-3, and ST8-6 are shown.
