Mucopolipidosis III β -N-acetyl-D-hexosaminidase A. Purification and properties

B. C. KRESS, S. HIRANI, H. H. FREEZE, L. LITTLE and A. L. MILLER

Volume 207 (1982)

p. 424, l. 20:

between 'weights of 58 000, 55 000 and 29 000.' and 'The muco-' insert:

A fourth band of molecular weight 68 000, although not readily visible, was a minor component of the normal enzyme.

Ca²⁺-dependent high-affinity complex formation between calmodulin and melittin

M. COMTE, Y. MAULET and J. A. COX

Volume 209 (1983)

p. 271, first column, l. 44:

for 3.0 mM read 3.0 nM

p. 271, second column, l. 13:

for 5.9 mM read 5.9 nM
